

CAD/CAM Components Inc - GeometryWorks3D® Features and Tools

Version 17.0 Release Notes

Introduction

Thank you for choosing GeometryWorks3D Features. This product uses SolidWorks® new interface called Macro Features, which allows full integration of parametric solids, surfaces, and curves. GW3D Features are created, edited, and rebuilt just like a native SolidWorks® feature. GW3D Features provides advanced class "A" curve and surfacing solution with powerful parametric surfacing capability.

Using GeometryWorks3D Features and Tools

Minimum System Requirements.

- SolidWorks® 2017.

GeometryWorks3D Features and Tools Installation Instructions

- Insert the GeometryWorks3D Features CD-ROM into the appropriate drive on your computer.
- You may require Administration logon.
- The Windows AutoPlay feature automatically starts the setup program. If you have disabled the AutoPlay feature, perform these steps:
 - From the Windows Explorer, expand the directory folders on the GeometryWorks3D CD-ROM. You will see the SETUP.EXE.
 - Double-click SETUP.EXE in this directory folder. This causes the GW3D Features Setup window to be displayed.
- Start Up SolidWorks2017.
- Select the "Tools\Add-In" menu.
- Select the check the box beside "GW3Dfeatures" to begin using..
- Uninstall of the program is completed through the Windows Control Panel and the ADD/Remove Program function. .

Getting Help with GeomertyWorks3D Features and Tools

CAD/CAM Components Inc is committed to providing you with the best possible product support. In order to get the fastest, most complete, and most accurate support, follow the steps below.

License Your Software (Evaluation Version)

You can license your GeomertyWork3D software in one of the following ways:

- Contact a GeometryWorks3D Reseller. Web page at <http://www.cadcamcomponents.com/partners/resellers.cfm>
- Contact us directly:

Technical Support Resources

Consult the [CAD/CAM Components Web site](#) for immediate access to a selection of useful information.

The site including the following:

- Technical information and product news
- Example part files
- Documentation updates
- Maintenance releases and updates
- Information support via Email.
- Resellers information
- Reviews

This information is available to you 24 hours a day, 7 days a week.

Contacting Technical Support

You have access to our Support Engineers via World Wide Web, fax, or phone (Monday through Friday from 8:00 a.m. to 5:00 p.m. Pacific standard time):

- WWW: <http://www.cadcamcomponents.com/misc/support.cfm>
- Fax: (949) 728-0734
- Phone: (949) 728-1309
- Cell: (949) 533-4635

You can also contact us by Mail at:

CAD/CAM Components Inc
San Juan Capistrano, CA 92675
31878 Del Obispo #118-332
USA

All issues are related to SolidWorks API. SolidWorks and CAD CAM Components are working to resolve all issues.

- Cannot Edit Curve features by right mouse click “Edit Feature”. All other ways are available.
- Cannot use Curve Body MacroFeatures (GW3D Feature) directly from the feature tree for SolidWorks features.
- Cannot Edit In Context in an Assembly.
- The colors of preselected entities or entities used to create a feature (during Edit Feature) do not display correctly.
